INTERCHANGEABLE CORES

Mac-Kae porcelain or mica cores
are interchangeable in any
Mac-Kae Spark Plug

PORCELAIN CORES COMPLETE

Our porcelains are all specially tested — the centre electrode made from an alloy of Platinum iridium and nickel (which has the same expansive co-efficient as the porcelain itself) is not liable to fracture this latter by sudden expansion or contraction.

PRICE 50 CENTS EACH

MICA CORES COMPLETE

The centre electrode in the core is wound laterally with selected sheet mica, which is protected with mica washers, compressed and locked in position.

The finish on the core is extra fine.

PRICE 50 CENTS EACH

MAG-KAE

SPARK PLUGS

will positively ignite every charge in each cylinder under all conditions, even when engine is running light and throttled down.

No Leakage

The electrode is baked into the porcelain and the cap keyed on by a patented process, making the core one solid unit.

Easily Detachable

The core can be removed or replaced by anyone — simply unscrew the brass bushing, when the core may be taken out in ONE PIECE.

No. 1024 6" ONLY

Price 50 cents each \$4.00 per dozen

Owing to the numerous imitations of a high grade slip joint plier, we have decided to put one out with a **very thin nose**. The advantage of this thin nose is that you can take hold of either a large or a small nut equally as well as you can with the big, heavy nose. Bear in mind that this tool is made of the best grade of steel, is drop forged and is guaranteed like all other **"Red Devil"** Tools. It is packed in an individual box and for automobile and general all-around plier purposes is unexcelled. Has a screw driver end and will cut wire.
